

September 9, 2025 – Core Team Meeting with Locus and Krammer

The meeting on September 9, 2025, focused on the schematic design for the First Unitarian Universalist church's renovation. Key points included maintaining a \$5 million budget, with specific allocations for the sanctuary (225 seats), commons, kitchen, nursery, classrooms, offices, and restrooms. The design will feature a blend of wood and steel for cost-effectiveness, with potential modifications to the sanctuary ceiling height and the elimination of the second floor. Access concerns for construction were discussed, with alternatives to using Centurion Court being considered. The team emphasized the importance of flexibility for future expansion and maintaining key features like the elevator and large sanctuary windows.
